

7. PROPOSED FRONT ELEVATION

This is how the proposed changes will appear when viewed from the High Street.

Photovoltaic Cells fixed to the east roof slope

New fully glazed entrance lobby with slated pitched roof. Frosted lettering and a logo on the glazing clearly indicates which door opens onto Council Offices and which door gives access to the new first floor office accommodation.

The recessed panel on the front of the building is shown painted in a solid colour: the three little images across the bottom of this page show further options for colour to give an identity to the building.

Reading left to right:

1. Strong colour? maybe more likely not to appeal to a greater number of people...
2. Neutral colour? might not generate strong feelings either way, but is that be a good design strategy?
3. New render with a textured finish? more expensive than a coat of paint...
